## *Healing Intelligence*

**The Spirit in Psychotherapy**

Painted by Lindsey Harris

---

Natural healing intelligence, one of the psyche's great mysteries, is at the core of working with emotional wounds. Depth psychotherapy passes beyond interpretation to work directly with this powerful force. This talk explores how practitioners can work with transcendent aspects of the human psyche.

*A talk by Alan Mulhern, an AJA trained analyst, introducing his book Healing Intelligence: Working with Darkness and Light (Karnac 2012), which explores the transpersonal dimension of Jungian analysis. Lindsey Harris discusses the series of images she created for the book.*
